AutoCAD LT Installation An AutoCAD LT Installation includes the software, and a number of tutorials and training videos, a manual and a CD. The CD includes AutoCAD LT customization files and templates. When installing AutoCAD LT, users need to select the number of license types from the license installation screen shown above. There are three license types: Standard, Professional, and Architectural. Standard Every user of AutoCAD LT has access to the Standard Edition, which allows users to create professional drawings for personal use or small businesses. License types for AutoCAD LT Standard Edition AutoCAD LT Standard Edition provides access to: • AutoCAD LT: This enables users to perform the functions that are typically found in CAD applications. • AutoCAD LT Web: This allows users to view professional drawings created with the software. Licenses available for AutoCAD LT Standard Professional Users who want to perform work for businesses and organizations, or who need more technical support, can purchase AutoCAD LT Pro. This version enables users to perform the functions typically found in CAD applications. Tools: The MSCAD tool is a command-line or scriptable application that performs various activities on drawing files, such as converting, cataloging, converting, or identifying the products. Forms/Subforms AutoCAD supports a variety of forms and subforms. Subforms are representations of the bounding box (BBOX), the page layout or page scales of a Drawing. Forms are representations of the model content of a drawing. Forms and subforms have fields that can hold more than one value. A particular field can be configured to hold one, many, or all of the values selected for the subform/form. AutoCAD's forms and subforms were inspired by Microsoft Access' forms and subforms. Preferences The Preferences dialog is a window where AutoCAD provides information to the user. The Preferences dialog is a tabbed interface with tabs such as Preferences for Drafts, Parameters, Communication, Preferences for Creations, Preferences for Drawings, Preferences for Models, Preferences for Plotters, Preferences for Projects, Preferences for Rasters and Preferences for Web Plots. The Preferences for Creation Options, Preferences for Display and Preferences for Computer-aided design tools are currently not tabbed. In the Preferences for Drafts tab, the User Preferences dialog can be accessed to configure user settings. The User Preferences dialog provides access to the following settings: The number of Paper Sheets on a page in a document. The number of Story lines in a drawing. The name of the draft document. The number of sheets to print per page. The name of the drawing used as the basis for the draft. The sheet margins, page orientation, number of pages per sheet, and print quality. The list of plotter profiles available for use. The list of regions to define for plotter region selection and plotter annotation. For users, many options can be accessed in the User Preferences dialog. In some cases, such as the User Preferences for Drafts, the User Preferences dialog is analogous to the User Preferences dialog for the first release of AutoCAD. AutoCAD Setup contains information about what features are currently installed and available for the current user. This dialog is accessed by pressing the keystroke ESCAPE. The AutoCAD Setup contains the following: For internal use, it contains the list of installed AutoCAD files. For external use, it contains information about the region, state, and country.
