The rebooted engine, combining "HyperMotion," renders fast-paced, high-impact football faster, more fluid and reactive, all using accurate and responsive movements, based on the actual player model. The new 'movement engine' is more accurate than ever, becoming more realistic and lifelike as game play progresses. During gameplay, it will respond to every movement and collision, turning players into their real-life, physical self. FIFA 20 is now compatible with Xbox Game Pass and EA Access. FIFA 22 continues to use the "Hostile Environment" match engine that first launched in FIFA 17. Next-gen enhancements include the ability for players to remain in the same split-second in time as they do in real life, and a wide array of improvements to the ball's behavior. The Graphics Engine For the most part, FIFA 22 improves the visuals in current-gen consoles in all areas of the game. This includes improved foliage, meshes, skies, shadows and pre-calculated reflections in water. The resolution is also improved, for example detailed grass textures are now included, grass and

terrain are smooth and the reflections are more realistic. Key elements of the “Hostile Environment” such as “bouncers,” “sweepers,” and players like Harry Kane in character are now added to the improvements of the graphics engine used in FIFA.

This all adds up to a much more visually appealing game on current and next-gen consoles. The sound of football is vital to the experience of playing a game, and FIFA 22 will deliver an explosive, realistic pitch. The goal is for all sounds from the full-game experience to be accurately captured and recreated, and FIFA 20 included numerous enhancements to the game engine for that purpose. Using a technology called “Precision Sound,” the game’s sound engine is more sensitive to the dynamic qualities of each sound source. The result is significantly improved dynamic audio effect recreations of all types of sounds heard in a football match. FIFA 22 introduces the Master League Sound System, which ensures fans will hear every whistle, boundary line, and fan’s scream. In addition, the pitch announcer has been improved. His voice is reminiscent of the real-life commentators and creates a more authentic match experience.

What's new:

- **FIREFACILITIES** Meet the newest collection in FIFA, the FIREFACILITIES containing items and kits you can use to add-interesting and unique tactical features to your football match.
- **GAMERA PICKER** One of the core elements of the new FIREFACILITIES is the ability to equip any player in the game with furniture, which can alter the way a player plays and is obtained, as it can affect three core components: dribbling, passing and shooting.
- **FIREFACILITIES CAN BE BOUGHT ONE BY ONE** Although the core components of furniture are constant between all items, every single one is equipped with its unique set of gameplay effects, which are affected by combinations of items. Start levelling up your favourite player, and kit them out with the best players and the best kits
- **BETAMOMETER** The BETAMOMETER uses a technique called Time-to-Impact to calculate a player's physicality, dribbling and passing skill in real time. Use the system to predict future events and make smart decisions.
- **DEVELOPMENT PEGI** leads the charge for all game development, as the ESRB and PEGI work together to create more accurate content descriptions for every game on the market. We go beyond traditional content descriptors, and ensure that the latest version of the game reflects exactly what occurs during a simulated match!
- **GAMEPLAY PATCHES** If you have an existing save file

for FIFA 21, you can load it into FIFA 22. We've done a lot of listening and diving into your feedback, and have implemented gameplay changes based on the real-world events that occur in a match. We've also come up with new ways to play and new graphical improvements and changes, too.

- **The PLAYING FIELD One of the most significant changes to the audio and visual style**

FIFA is a football video game series developed and published by Electronic Arts. The series began development in 1989 for the Atari ST, Commodore Amiga and the MS-DOS. After the release of FIFA for the PC in 1993, a Windows version was released in 1996. The game was first brought to the Nintendo 64 and the GameCube in 1999. In 2002, the PS2 was the platform of choice for the title. Later in 2008, FIFA 13 was released on the PlayStation 3, Xbox 360, Microsoft Windows and Xbox 360. In 2012, FIFA 13 Ultimate Team mode was introduced, where a user could take on the role of a manager and build a team from scratch. In 2015, EA Sports released FIFA 16, featuring new gameplay innovations and next-gen presentation, including high-fidelity visuals. In 2016, Electronic Arts released FIFA 17, expanding the Ultimate Team formula and introducing FIFA's first 3D broadcast. In 2017, FIFA 17 Ultimate Team was introduced, again extending the franchise's play-to-play and user-generated gameplay. In 2018, FIFA 22 was released, and was the first game in the franchise since FIFA 17 to see a simultaneous PlayStation 4 and Xbox One release. Gameplay

FIFA is a simulation video game developed and published by Electronic Arts. The series has run on various home computers, consoles, and mobile devices. FIFA was originally a series of games created for the Atari ST, Commodore Amiga and MS-DOS computer systems from 1989. The game was first released for Microsoft Windows in 1993. After the release of FIFA for the PC in 1993, a Windows version was released in 1996. The Nintendo 64 and GameCube versions of the game were released in 1999. From 2001 to 2008, FIFA was ported to the Sony PS2 and Xbox. In 2002, FIFA became available on the Nintendo PlayStation. Gameplay in FIFA has several key mechanics designed to simulate the sport of football. FIFA allows the player to develop and play as the foot ball

through many gameplay elements. The most prominent feature of FIFA are the controls which allow for players to have control of their on-field performance. The controls consist of the analog control stick which allows the player to move their player around the field and click on the ball itself which prompts the player to shoot or head the ball. There is also a new control scheme known as Dynamic Access Player System or DAPS that includes a boost button which allow the players to quickly increase
