DROD: The Second Sky is a turn-based strategy game where you take on the role of a young adventurer haunted by a swirling storm of dark towers. In these mobile dungeons, known as rooms, you will face a series of increasingly challenging puzzles as you guide a small party of adventurers through a variety of lush and varied locales. This is a game that emphasizes powerful, randomized gameplay elements, and a lovingly crafted graphical experience. The gameplay is turn-based, meaning that every player spends their turns moving, fighting, casting spells, and/or acquiring additional information. Every key action — every move, every movemata, every turn — affects the game and the events surrounding it. Key Features: Turn-based strategy game with multiple game modes. Over 500 puzzle rooms organized around 17 distinct puzzle element types. Created by an international team of passionate designers and developers. Playable on Windows and Mac OS X. Can be played without DRM restrictions. Over 250,000 unique level rooms created by our players! Rated "Mature" by the ESRB. The powerful custom scripting and user-modification features 1:35:35 = thirty seconds per turn; 4:1 = four turns per minute. THE FOUR THINGS THAT MAKE A GREAT MONSTER When The Second Sky was made in late 2006, we looked at DROD and all of its predecessors as the start of a new era for this series. The world has always been chock-full of monsters. There are, at least, two exceptions to that, and we are proud to announce the development of Monsterpedia, an in-depth database of monsters. Monsterpedia's goal is to be the first place to go when you need to know the physical, mental and psychological properties of a particular monster, so that you can better plan for your encounters and respond accordingly. Monsterpedia is under active development with a goal of becoming the definitive source for everything you need to know about monsters. So far, we've got 20,000 monsters from all of the games in our database! The Monsterpedia team (no, we didn't name it ourselves) has also recently started a Kickstarter project to crowdfund the creation of the remaining 20,000 monsters so that the database can be finished. In the meantime, monsters are going to pop up in our games as we continue. Here's a look at the four things that make up a great monster: The Style and Look

For some reason, there are only two outcomes on the show. You win/you lose. I do fairly well at the game, so I win. It's not even been a competitive matchup for a decade. For the first time in a long time, I think I have a real chance of winning. It looks like the whole house could come in with me. We have 3 hours to get there. PC - Linux - Windows Game based on the concept of homage to Space Invaders and Space Invaders 2, Back to the future, StarTropics, StarGunner and Space invaders. It is a retro pixelstyle shooter, where you can shoot all the enemies and you can follow the chain. You can play in 2 different modes: Arcade mode and Deathmatch. In Arcade mode, you just play through the chain of enemies and bosses: get stars when you shoot enemy, get more stars if you kill more enemies. You get rewards for every chain. Basically, you play the whole game for a single boss. If you choose the Deathmatch mode, a big chain of enemies will appear and you just shoot to eliminate them all. Of course, to get a reward, you have to kill all enemies. The game uses SDL2 and OpenGL2, with all rendering and the 3D models were built from scratch. We have a release candidate version 1.0.1, please report all your bugs to us here: [www.zebrawiki.net/forums/showthread.php?t=37704](http://www.zebrawiki.net/forums/showthread.php?t=37704) ----- Changes from version 1.0.1 to 1.0: - All scripts to version 1.0 now - The whole code is commented. If you want to add new features, please comment the code accordingly. - Cleaned the whole code - Fixed some bugs in the scripts - Setting up a cross-platform build system, which now it is possible to build the game both on Windows and Linux - Added some new sound effects - Added "Pause" mode: when you are in the "Pause" mode, the game just open the chain when you are in "Play" mode and when you press the fire button, you go to a pause menu. - Added "Crosshair" mode, when you are in this mode, the crosshair will move around and will be hidden whenever you are shooting. - Have You played Space Invaders? By the way, if you noticed, you can choose between Space Invaders and Space Invaders 2 in the settings. This is what I did: 
$$f(x+h) = \sqrt[3]{x+h} = \sqrt[3]{x} + \frac{1}{3}(\sqrt[3]{x})^{-2}h + \frac{1}{6}(\sqrt[3]{x})^{-4}h^2 + \frac{1}{24}(\sqrt[3]{x})^{-6}h^3 + o(h)$$
