buy it. Jz1776 04-13-2011, 02:09 PM What kind of windows you have? It can't have to be Vista or XP. vouzas 04-08-2011, 04:27 PM Hello thanks for answering my question but i want to install this crack on xp.so i have downloaded the crack from here and here but it doesnt work no mouse button.

Fast and Furious 1.9.7.0.28 You have to install this with administrator privileges. On windows XP you must have at least version 2003. It is the last version from v.1.9.7.0.28. It is a cracked version of the Fast and Furious, you should download the executable from above. If you have the Fast and Furious and you want to install it then please follow this instructions. To make this possible you need to download:

1. MP3Extractor for windows. Go to and download the first/second option.
2. Run the MP3Extractor and right click on the Fast and Furious icon and click "Extract here" then click "Save to HardDisk" and keep this folder and name it Fast and

Furious. 3. Now run the Fast and Furious and click the little circled arrow to the right of the mouse icon and you will see a "Install" button.
