There is a point to this game. During the course of play you will have to complete levels or escape the donut, and at the end of the game you will have to solve a puzzle. And at first, you have to do these things just to play the game. Soon, though, it becomes apparent that these actions are making a statement about the life of the character and the setting in which he lives.

Destructoid
Coffee Coffee: After playing through the game in its entirety, I've decided that Coffee Coffee is probably about a mug of coffee that got turned into a coffee donut. What this means is, if you play the game long enough, it'll start to make sense. The donut actually does have feelings; so if you abuse the coffee, it will seek revenge and raise the obstacles. Also, it gets mad if you use weapons on it, and there is a wonderful little shield that can help you survive its wiggly projectile attacks. The enemies are small, quirky, and

just weird enough to be fun. Because the coffee and the donut are both living entities, there is a good amount of variety between each one. Sometimes you'll just need to turn your attention to an obstacle and clear it away to proceed, and sometimes you'll have to take the donut out of its machine, where you have to battle it before you can rescue the coffee. It's quite a nice change from the world of Team 17. [GamingTomopopGamesCan't Stop The Suck](#): For the most part, Coffee Coffee is a pretty entertaining game. The game plays like a non-stop carnival funhouse, with enough new ideas to keep you on your toes. It's basically the least harmful, accessible game of mini-games, and they all work extremely well together. The graphics are nice and colorful, though I would suggest a less terrifying neon backdrop, just to make the game more accessible to the casual audience. [IGNvideoGamerRecap](#): "Some

people, when they're in a pickle, find the time for melding things into jolly confections of action and music. Others, when in a pickle, find the time for healing and sipping coffee. For me, I find the time for the healthy combination of both. When I was confronted with a puzzle that required not just that I maneuver an inanimate object, but also the destruction of an inanimate object, it seemed like a moment to really let my senses run am
