If this file is not specified or does not contain any data, then the last library item of the last

page loaded is used. * Only the last selected item (or the last item 3a67dffeec

MyLibrary

========= MyLibrary plugin allows to add a predefined item to a selected item in a web page. The user can select a predefined text from an editable textbox and the selected text is replaced by a library item. The library items can be a text, an URL, or a graphic object. It is also possible to add an item in front or at the back of the selected item. MyLibrary provides also a menu item which allows to add an item from a predefined list. WP-Admin-Template This is a template for a WordPress admin dashboard created with the WP-Admin plugin. The widget and plugin are available for free at: Features: - A very simple and lightweight template. - Uses WordPress 3.7+ functions - Uses WordPress widgets on the home page and the 2 available dashboard widgets - Uses wp-admin (only on the dashboard pages) - Uses MyLibrary plugin - Uses the MyLibrary Plugin Conditional System to change the generated content - Includes the special, extra, and smart tag template - Uses WordPress default styles WpAdminPanel This is a WordPress widget that lets you develop and maintain a page by allowing you to add and edit content. It is similar to the Wp-Admin template above. Features: - A very simple and lightweight widget. - Uses WordPress 3.7+ functions - Uses WordPress widgets on the home page and the 3 available dashboard widgets - Uses MyLibrary plugin - Uses the MyLibrary Plugin Conditional System to change the generated content - Uses WordPress default styles MyLibrary Widget A simple plugin that provides a widget (a button in a dashboard, in a sidebar) which opens the MyLibrary application. This is to allow MyLibrary users to access MyLibrary from within WordPress, just like a regular WordPress application. This plugin is created to be used in any custom plugin or theme that needs to use the MyLibrary plugin. In that case, the MyLibrary widget should be included in this plugin or in the appropriate plugins or themes. MyLibrary Autocomplete This plugin adds an autocomplete option to the myLibrary form filler plugin. It's a simple and lightweight plugin that can be integrated to any site. All you need to do is replace MyLibraryAutocomplete with MyLibrary on this file

(mylibrary-autocomplete.js

What's New In?
